

SHEPPARD AIR FORCE BASE ENVIRONMENTAL, SAFETY, AND OCCUPATIONAL HEALTH POLICY

Compliance Policy

Sheppard Air Force Base will comply with all federal, state, and local environmental regulatory requirements, as well as all Department of Defense (DoD), Air Force (AF), Air Education and Training Command (AETC), and Sheppard AFB regulations, instructions, policies, plans, and directives.

Prevention of Pollution Policy

Sheppard AFB will continue its effective "Compliance Through Pollution Prevention" (CTP2) initiatives by:

- Eliminating compliance sites through process elimination or reduction, to the maximum extent possible.
- Reduce hazardous material purchases and use through process changes or reduction, product substitution, and proper material management procedures.
- Reduce solid waste disposal through aggressive recycling efforts.
- Maximize purchase of supplies and materials containing recycled content products.

Safety and Occupational Health Policy

Sheppard AFB will continue its effective safety and occupational health initiatives by taking all reasonable steps to prevent work-related ill health, and to support the general health and well-being of its employees; and:

- Provide adequate control of the health and safety risks arising from our work activities.
- Provide information, instruction and supervision for employees.
- Prevent accidents and cases of work-related ill health.
- Maintain safe and healthy working conditions.

Continual Improvement Policy

We will continue to respect human health and the environment, as well as our Sheppard AFB community partners. We will continue to foster a spirit of cooperation by building relationships with regulatory agencies, interest groups, stakeholders, and our community to engender collaboration, cooperation, and mutual understanding. We will continue to provide a cleaner and safer environment through the education, support and involvement of all personnel through environmental compliance, prevention of pollution, restoration of past contamination sites, and conservation of natural and cultural resources. Sheppard AFB will continue to implement this policy in its respective organizations, down to the lowest level. We will continue our policies of improvement, measurement, and evaluation through our Environmental Safety and Occupational Health Committee (ESOHC) organizational structure.

JEFFREY B. KENDALL, Colonel, USAF
Commander, 80th Flying Training Wing

RICHARD T. DEVEREAUX
Brigadier General, USAF
Commander, 82d Training Wing
